Web developer Courses

Web developers plan and program websites. More specifically, developers are responsible for focusing on the technical nuts and bolts of a site and implementing site elements using programming languages such as HTML5, CSS3, JavaScript, XML.... Developers may produce the "back end" of the site, integrating databases and producing the site's functional infrastructure such as payment applications for e-commerce

The course is available Full Time DURATION: One Year over 5 days in a Week. Part Time over on evening 6pm -8pm and Saturday mornings.
